

# Creating Your VR-Based Safety Training

It's not just for gaming any more. Virtual Reality (VR) can provide real value to businesses through hands-on experiences that are immersive, engaging and specific to your unique needs. If you believe in the value of VR for your organization or want to explore how VR could benefit you, this workshop is a valuable first step.

## WHO IS THIS FOR?

Managers responsible for safety training in their organization that want to envision a VR safety training experience. You'll get hands-on experience with VR training, engage your stakeholders, spark discussion and create a plan for using VR.

## COST

\$5,000 per team for an initial planning meeting, workshop facilitation and iterative design work to design and plan your custom VR training experience.

## FREE CONSULTATION

Contact us to begin planning. Call us at **724. 602. 0286** or email **[vrworkshop@openarc.net](mailto:vrworkshop@openarc.net)**

## WHAT DO YOU GET?

OpenArc's VR team works with you one-on-one in this collaborative engagement to create:

- hands-on experience with existing VR training examples
- an overview of your high value training needs
- a storyboard for key safety training tasks that includes scenes, interactions and feedback
  - a list of environments, equipment and objects to import or acquire for your training
  - a summary of tracking and reporting needs
- a summary report that articulates your vision
  - with a plan to create it
  - a proposal with timeline and costs for
- implementing your VR training session
